

Hello there!

This is a short guide on how to download the 'Sudoku FYP' .APK file on your own Android device.

To download the Android APK, please visit the following URL link:

<https://expo.dev/artifacts/eas/2Nr9pawmLtQdvR3KYBiPUK.apk>

You can also scan the following QR code which will navigate you to download the APK:

For IOS users, I can advise on checking the detailed guidelines in the README.txt or README.md file, there is explained on how to run the Expo (Virtual Emulator) and emulate the application on your own IOS device.

Thank for your attention!

I hope you will play at least one Sudoku game on my simple mobile application :)
